Information Disclosure Statement

The information disclosure statement filed February 09, 2004 has been considered and has been made of record.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims 1-43 the applicants have used the term "fiber ***constituent***"; it is not clear what the applicants are intending to convey by use of this term. Also, the terminology "amide-based polymer" is considered to render the claims indefinite because the term "based" extends the scope of an otherwise definite term. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 and 20-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Windley (USP 5,155,178).

Windley discloses blends of nylon 6,6, nylon t or nylon 6,6/6 copolymer which contain a randomly copolymerized cationic dye modifier formed by melt blending such copolymer with a polyamide having 8 to 22 carbon atoms per amide link to form a block copolymer composition, a fiber made from the composition and a shaped article injection-molded from the composition. See abstract; claims; cols. 1-7.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited to show the state of the art of polyamide/nylon compositions and fibers; Simons, Windley, Wells, Mohajer, Stefandl, Ilg, Studholme and Bank.
